

Flero Beams Service Center

Machine

3 cutting line – capability to process profiles up to 1.200 mm width and degree cut up to 60°

2 drill line – capability to drill profiles up to 1.200 mm width

1 oxygen cutting line – capability to process profiles up to 900 mm width

1 cut and drill line for angle from L40x4 up to L150x15

Beams IPE, HEA, HEB from 100 to 600 in stock.

UPN 80 to UPN 400 in stock

Angles and L from L40x4 to 150x15 in stock

Priority to all ArcelorMittal Long Carbon production.

Quality Certification

The Flero service center is able to offer itself as the best partner of all the most qualified Italian steel builders, thanks to reliability, efficiency and precision. In addition to the certainty of the containment of cutting, drilling and notching costs due to the industrialization of processes, it is possible to count on a structure organized according to procedures certified by the ISO 9001: 2008 quality system and compliant with ISO 45001: 2018 standards.

For the construction of structural steel components made of steel up to execution class EXC 3 in accordance with the technical requirements of the EN1090-2 standard, with methods of declaring product properties 1, 3a, the Flero service center can count on the EN1090-1: 2009 certification; EN1090-1: 2009 / AC: 2010; EN1090-1: 2009 + A1: 2011
